TELECOMMUNICATIONS AND RADIO ENGINEERING

CONTENTS FOR 1976

Number 1

	Page English	Page Russian
PART 1 TELECOMMUNICATIONS Volume 30		
MULTICHANNEL RADIO COMMUNICATIONS		
L. Ya. Kantor: A New Approach to Estimating the Utilization Efficiency of a Geostationary Orbit	1	5
K. P. Mustafidi and G. M. Finogeev: Carrier Energy Dispersion in Television Transmission	6	11
MULTICHANNEL WIRE COMMUNICATIONS		
D. A. Borovinskaya, Z. Ya. Gelmont, L. P. Leval'd, T. F. Metel'kova and M. I. Stein: A Quartz-Crystal Through-Connection Filter for Master Groups	12	17
Yu. D. Farber: Multichannel Communications Systems Based on Frequency Division of the Signals	16	22
M. G. Oisgelt: Selection of an Optimum Version of the Procedure for Expanding the Multiplexing Capacity of Coaxial Cables	24	32
A. A. Gorbachev, G. I. Lazdin, Ya. G. Rodinonov and V. M. Shushin: A Method for Suppressing Narrow-Band RF Interference in Wire Communication Lines	27	34
TELEGRAPHIC AND PHOTOTELEGRAPHY		
A. I. Golovatenko, B. V. Korop and S. I. Tarbayev: Elimination of the Effect of a Frequency Shift in the Tone Frequency Channel on the Operation of a System of Voice Frequency Telegraphy with Frequency Modulation	31	41
V. A. Uzilevskiy: A Photocomposing System for the Transmission of Newspapers over Communications Channels	35	46
B. P. Terent'ev and A. I. Sitnikov: Probability of Distortion in Electronic Keyboard Combiners with the Simultaneous Depression of Several Keys	39	51
WIRE AND RADIO BROADCASTING		
E. B. Kuznetsov and S. L. Mishenkov: Stability of the Transfer Ratio of Intercity Broadcasting Channels	41	54
V. G. Buryak, S. L. Yakovlev and V. P. Smolenskiy: Visual Monitoring of Amplitude Modulation Depth	43	56
L. Z. Papernov, M. A. Khazanova and V. I. Golovchenko: Effect of Noise on the Noticeability of Uninverted Crosstalk	46	59
O. V. Dogadin: A Highly Efficient Wire-Broadcasting Transmitter	49	63
CIRCUIT THEORY AND FILTERS		
I. I. Trifonov: Optimizing the Frequency Responses of Lossy Electrical Network	52	65
P. M. Todorov: T-, π-, and L-Network Conversion	56	70

Page

English Russian

PART 2
RADIO ENGINEERING
Volume 31

L. P. Chumakov: Noise-FM Rangefinder with Correlation Processing of Signals Using the Beat-Frequency Method 62 7
O. V. Gofaizen, A. V. Mindel and V. F. Brin'ko: Signal Spectrum in a Television Holographic System 67 13
M. V. Biletov, I. S. Vassershtein and V. V. Ryl'skiy: Detection of Radar Signals When They Fluctuate in Strength with a Nakagami Distribution 69 16
Yu. L. Bortnyakov: Coding Efficiency When Transmitting Continuous Data in Pulse-Code Modulation Systems 72 20
K. I. Chaiko: Method of Evaluating Transmission Reliability in Digital-Data Channels 76 25
G. A. Yufit: Filters Using S-Sections with Distributed Coupling 81 31
O. N. Tereshin and R. S. Azoyan: Generalized Boundary Conditions of the Impedance Type for Two-Dimensional Periodically Loaded Strip-Type Structures 85 36
V. G. Sheynkman: The Potential Limits of Linear Phase Tuning in Reflex-Type Phase Modulators 90 43
B. S. Kogan and Yu. L. Simonov: A Common-Collector Selective Amplifier 94 48
G. I. Tuzov and M. A. Talalay: Nonlinear Synthesis of a Receiver of a Phase-Shift Keyed Pulsed Pseudorandom Signal 97 53
A. A. Ermolayev and V. I. Gutsu: Calculation and Measurement of the Noise Factor of a Composite Emitter Follower 100 57
A. M. Bilenkis: Liquid-Crystal Displays with Auxiliary Nonlinear Elements 104 67

BRIEF COMMUNICATIONS

V. A. Kalabekov and L. A. Letnik: An Analysis of One Method of Improving the Cyclic Synchronization Parameters of a PCM Communications System 107 71
V. N. Shkalikov: Phase-Shift Keyers Employing Frequency Multipliers with Oppositely Connected Varactors 109 73
V. F. Ivanov and V. N. Repinskiy: The Phase-Amplitude Characteristic of a Parametric Amplifier Employing a Varactor with a Conducting p-n Junction 110 75
B. F. Bunimovich, L. V. Vasil'yev and V. P. Meshanov: Determination of the Maximum Approximation Domain in Problems of Synthesizing Linear Electric Circuits 113 78
B. N. Dobzhinskiy: More on the Stability of Linear Systems 114 80
S. B. Meleshchuk: Computer Simultation of a Digital Error Flow 115 81
V. A. Gurov: The Synthesis of Multistage Pulse Amplifiers by the Method of Zeros and Poles 117 83
I. A. Globus: Evaluation of the Noise Immunity of the Noncoherent Reception of Multipositional Signals by the Binary Detection Method with Logical Recognition 119 85
N. N. Tetekin: Evaluating the Average, over Short Samples, of Narrow-Band Processes 122 88
V. P. Semenov: The Transient in the Detection of Radio Pulses by a Diode Detector 124 90

FOR THE ENGINEER

B. A. Shvarts and A. M. Kaganskiy: The Near Field of Loop Antennas in the Coupling Zone 126 93
O. V. Dogadin: The Simplified Circuit of an Amplifier in Class D Operation 127 94
B. Z. Kats: The Errors of a Pulse-Phase Detector 128 96
V. M. Kibakin, O. A. Gil'man and N. B. Petyashin: A Method for Improving the Output Signal Waveform of a Keying Oscillator 131 99
V. I. Kas'yanov: The Characteristics of a Transistor, Connected in a Common-Emitter Circuit, According to the Moll-Ebers Model 134 104
Yu. V. Zavrazhnov: The Effect of the Capacitance of the Coupling Capacitor on the Intermodulation Distortions of the Signal in a Transistor Amplifier 137 108

PART 1 **TELECOMMUNICATIONS** **Volume 30**		
COMMUNICATION LINES		
I.I. Grodnev and V.M. Dmitrachenko: Aspects of the Development of Guided Systems for Intercity Communications	1	4
Yu.D. Guberman, N.S. Par'ev, N.A. Polekh and S.A. Sokolov: Dynistor Protection of the K-60P System	9	16
AUTOMATIC SWITCHING AND TELEPHONY		
P.I. Zhuk and V.I. Korol': Estimate of the Operating Performance of Communications System Terminal Equipment	13	27
M.A. Zharkov and M.N. Stoyanov: The Common-Channel Telephone Signalling System	18	32
V.G. Dedoborshch and E.E. Urm: Determination of the Temporal Parameters of a Common Signalling Channel	21	35
S.V. Golubtsov and L.M. Kostryagina: Estimate of the Noise Immunity of the Phonem Vocoder	24	38
ANTENNAS AND FEEDER DEVICES		
S.P. Belousov, V.D. Kuznetsov and V.I. Timonina: ARRTZ-2 Medium-Wavelength, Anti-Fading Antenna with Grounded Base	27	40
V.D. Kuznetsov, L.S. Kazanskiy and A.N. Nechayev: Transmitter Decoupling in Frequency Multiplex Devices of the Antenna Feeder Circuit	32	46
N.N. Borisov, and O.P. Frolov: A Method of Aligning Reflector Antennas	35	49
DATA TRANSMISSION		
B.S. Danilov, S.V. Stukalov and Yu.A. Tamm: A 4800 Bit per second Adaptive Modem Part I. Design	38	52
Yu.A. Tamm, B.S. Danilov, V.V. Orlov, S.V. Stukalov and M.G. Steinbock: Part II. Some Results Obtained from Testing an Adaptive Modem	43	58
A.S. Adzhemov: The Multiplication of Errors when Transmitting Digital Data by the Sliding Index Method with Confirmation	46	62
SIGNAL GENERATION, AMPLIFICATION AND PROCESSING		
N.N. Yelfimov and G.B. Al'tshuller: The Amplitude Relations in Quartz Oscillators	52	68
V.P. Petropavlovskiy, N.S. Trushkin and N.V. Sinitsyn: Analysis of Phase Jump Transients by the Difference Function Method	55	71
PART 2 **RADIO ENGINEERING** **Volume 31**		
A.I. Fal'ko: Design of Optimum Communications Systems for Operation in the Presence of Concentrated Interference. Part II	60	3
M.V. Chernyakov: Synthesis of Optimum Receivers for an Asynchronous Address Communications System with Intrapulse Phase-Shift Keying	66	11
D.B. Golovin and A.A. Kuznetsov: Batch Reception of Digital Data When Transmitted with a Synchronizing Signal	72	19
K.K. Reutova: Estimation of the Effect of Distortions of Phase-Shift Keyed Signals on Their Correlation Characteristics	77	25
L.A. Ivanova, I.N. Saliy and A.S. Tseluykin: Determination of the Polarization Characteristics of the Field of a Traveling Wave in Multiple-Conductor Periodic Lines by the Method of Electrostatic Induction	81	36

	Page English	Page Russian
O.P. Novozhilov: The Use of an Alloyed Semiconductor Diode with Charge Storage in a Frequency Multiplier Circuit	85	42
Yu.M. Bruk: Period Synthesizer with Rational Approximation to the Period Grid	91	49
A.E. Aksenov: Directional Couplers Using Lumped Inductive and Capacitive Components	95	54
L.M. Blyumberg and I.Ya. Lef: Realizability of Electronic Networks	100	66
O.G. Alekseyev and Yu.A. Suzdal'tsev: Optimizing the Set of Spare Components for Radio and Electronic Equipment	104	72
BRIEF COMMUNICATIONS		
V.S. Gutin: Compression Filters for Phase-Shift Keyed Signals with Multiple Use of a Delay Line	108	77
V.P. Narbut: The Field in the Vicinity of the Light-Shadow Boundary When a Cylindrical Wave is Diffracted by a Half-Plane	109	79
V.F. Mukhin: Action of Interference on a PAFC System with Counter-Type Frequency Dividers	111	81
E.I. Koroleva: Algorithms for Calculating the Spectra of Signals	113	83
V.S. Ostroukhov and G.I. Tuzov: Certain Features of the Central Region of the Autocorrelation Function of a Signal with Frequency-Phase-Shift Keying	115	85
M. Mukhitdinov and V.M. Rozhkov: Determination of the Optimum Load of a Photoresistor Operating Under Pulsed Conditions	116	87
A.P. Gorbachev and A.N. Romanov: Wideband Microwave Power Combiners	118	89
A.N. Tsareva: Transient Responses and Distortions of Stages with Sequential Control	120	91
FOR THE ENGINEER		
P.A. Savis'ko and M.A. Ermoshin: Calculation of the Pulse Responses of Photoelectric Circuits	123	96
E.G. Markosyan and R.G. Aleksanyan: Integrated Voltage Dividers with Correlated Resistor Topology	125	99
V.B. Kozyrev: Special Factors in The Design of Filters for the Output Stages of Radio Transmitters	127	100

AUTOMATIC SWITCHING AND TELEPHONY.
COMMUNICATIONS NETWORKS

V.I. Glinka: The Development of Telephone Communications in the USSR	1	1
O.N Ivanova: Scientific Aspects of Automatic Switching	4	6
E.A. Zaionchkovskiy: Some Problems of Trunk Telephone Network Development. A Discussion Paper	7	11
M.F. Lutov and V.P. Parilov: Present State and Future Development of Quasielectronic Automatic Telephone Offices	13	18
V.V. Shtager and K.P. Mel'nikov: Present State-of-the-Art and the Prospects for the Introduction of Electronic Switching Systems	17	23
I.M. Gubrenko, I.Z. Ioffe and E.V. Kuchumov: Telephone Sets, Pay Telephones, History, Present State, and Development Prospects	20	27
G.V. Vemyan and M.Z. Petrova: Technical Progress in the Estimation of Speech Signal Telephone Transmission Quality	28	38
A.V. Kotov: The "Subscriber-Telephone" System. Psychological-Engineering and Ergonomic Criteria in Telephony. A Discussion Paper	31	41

	Page English	Page Russian
ANTENNA-FEEDER DEVICES		
L.N. Barnkov, V.D. Kuznetsov, A.M. Model, and V.A. Stuzhin: A Circuit Based on a Semireflecting Structure for Adding Signals of Different Frequencies	36	61
I.Z. Berlyavskiy, V.A. Antsiferov and N.B. Kolonikin: A High-Power Decoupling Circuit	39	66
TELEVISION		
A.A. Medvedev, Yu.F. Korneev and B.A. Khanov: Investigation of Systems for Assigning Frequencies in a Television Broadcasting Network	43	69
E.V. Babkin: A Weighting Filter for the Measurement of Fluctuation Noise in a Chrominance Signal	46	72
V.K. Ivanov: Crosstalk Distortion and Differential Gain in TV Relay Station Channels	50	75
PART 2 RADIO ENGINEERING Volume 31		
V.I. Voloshin and T.P. Gubkevich: Estimation of Electromagnetic Compatibility of a System of Identical Radio Facilities	55	8
V.P. Kuznetsov: Stable Detection When the Signal and the Spectrum of Normal Noise are Inaccurately Known	58	12
E.S. Golovin: Statistical Characteristics of Signals in a Mobile Receiver for a Particular Model of Multipath Propagation of Radio Waves	65	20
Yu.V. Paramonov: A Scheme for Coding Time Samples with Nonuniform Signal Quantization	70	27
V.I. Shakhtarin and B.V. Vorob'ev: Investigation of Induced Oscillations in a System with Periodic Characteristics	73	30
V.I. Redechkin: Derivation of the Propagation Constant in a Ferrite Layer with an Arbitrary Direction of Magnetization	78	37
N.P. Timirev: Radiation from Half-Ellipsoid Helical Antennas	81	40
G.K. Galimov and M.B. Vysotskaya: A Two-Reflector Antenna with Concentric Reflectors	86	46
V.I. Tokarev and L.R. Yavich: Synthesis of Symmetrical, Three-Section Directional Couplers	89	51
V.V. Zimin: A Frequency Doubler	92	54
A.A. Dvornikov and G.M. Utkin: Some Problems in the Theory of Mutual Synchronization of a Set of Oscillators	96	42
I.G. Kirenskiy: Simplification of the Equivalent Circuit of a Transistor Frequency Converter	100	66
B.A. Struyukov and Yu.M. Zverev: Phase Regeneration in PAFC Systems	103	70
K.A. Shutskoy: Noise Figure of IC Tuned Differential Amplifiers	109	78
M.V. Gitlits: Application of Adaptive Methods to Magnetic Recording	113	84
K.H. Kraass: Electrically Conducting Rubber — A New Material for Electronics	117	88
BRIEF COMMUNICATIONS		
E.N. Khomyakov: Estimation of the Parameters of the Probability Distribution of Gaussian Quasiharmonic Fluctuations	118	90
FOR THE ENGINEER		
A.G. Ostapenko: The Synthesis of Active RC Filters	120	93
V.R. Berman: A Push-Pull Transistor Magnetic Sweep Generator	124	99

Recent Achievements and Plans of Soviet Communications Engineers	1	1
MULTICHANNEL COMMUNICATIONS		
O.I. Astashkina, N.A. Dronova, A.A. Leshchinskiy, N.E. Popova and A.I. Kharitonov: Unified Terminal Equipment for Transmission Systems with Frequency Division of the Channels	4	5
A.S. Yuzzhalin: Calculation of Tropospheric Link Transmitter Powers	11	13
M.A. Bykhovskiy: The Design of FM Diversity Reception Circuits	14	17
TELEGRAPHY AND FACSIMILE		
E.A. Demin, L.A. Chinenkov, A.A. Makarov, V.S. Gavrilenko, Yu.I. Borisov, G.Kh. Garskov, G.A. Chernetskiy, K.A. Sharov, and B.P. Shcherbakov: Apparatus for Radio Telegraph Transmission over Meteor Channels	22	25
A.I. Kordobovskiy and A.M. Shestopalov: Telegraph Systems with Fast Phase Establishment	26	31
V.M. Batayev and O.V. Kulikovskiy: Choice of Color System for Picture Transmission by the Differential PCM Method	30	35
L.N. Yakhins: Industrial and Business Communications Equipment	35	62
SIGNAL GENERATION, AMPLIFICATION, AND CONVERSION		
Yu.V. El'terman: Frequency-Synthesis Techniques and Methods for Improving Them	40	67
V.A. Levin and D.G. Nisnevich: Some Problems in Digital Frequency Synthesizer Design	44	73
PART 2 **RADIO ENGINEERING** **Volume 31**		
E.L. Kazakov: Statistical Model of a Radar Target at Centimeter Wavelengths Taking into account the Polarization Properties of the Target at Many Frequencies	51	1
O.V. Gofayzen, A.V. Mindel' and V.F. Brin'ko: Reconstruction of the Wavefront of Fourier Holograms, Transmitted Over a Television Channel	54	5
V.M. Sidorov and V.I. Kudashov: A Method of Determining the Spectrum in Devices with Amplitude-Phase Conversion	58	10
R.M. Turkel'taub: A Generalized Uncertainty Principle	64	18
I.V. Sitnyakovskiy: On the Asymmetry of Integrators in Communications Systems with Delta Modulation	68	23
V.I. Makkaveyev: Digital Modeling of Optical Communications Systems	70	26
B.M. Zaikin: A Refined Algorithm for Analyzing Circuits Consisting of 2n-Terminal Microwave Networks	74	31
V.K. Marigodov: Transient Characteristics of a Channel with Optimum Preemphasis	77	36
Yu.V. Vaysleyb and E.G. Kirkheyzen: Theory of a Matched Slotted Bridge for Circular Waveguide	80	39
V.N. Shkalikov: Effect of Detuning of the Input Circuit on the Conversion Efficiency of a Frequency Tripler Containing an Unloaded Tuned Circuit	83	43
V.D. Belov and V.G. Shmigel'skii: Effect of Local-Oscillator Noise on Output Signal Spectrum Purity in Diode Frequency Converters	88	49

	Page English	Page Russian
L.E. Zolotukhin: Nonlinear Distortions of a Single-Sideband Transmitter Operating with Carrier Residue	93	54
E.I. Churkin: Statistical Dynamics of a Modified PAFC System with a Lowpass Filter	96	58
A.L. Gutman and L.A. Perel'shtein: Application of the Laplace Transformation to the Analysis of the Action of Noise on the Nonlinear Parameters of Reception Channels	103	66
M.G. Gordon: Theory of Audio-Signal AGC Systems	110	79
V.A. Gorokhov and R.G. Mgebryan: Engineering Calculation of Crystal Overheat in Semiconductor Devices under Periodic Pulsed Load Conditions	112	82

BRIEF COMMUNICATIONS

R.A. Metrikin and A.M. Seluyanov: Mirror-Antenna Radiation-Pattern Measurement Results for Multimode Channel Operation over a Broad Frequency Range	117	87
V.B. Katok: Analysis of a Waveguide of Complex Cross Section	118	89
A.F. Shcherbakov: Calculation of RF Impulse Interference Power in FM Multichannel-Communication Radio-Relay Systems	119	90
A.V. Samsonov: Theory of the High-Level Diode Frequency Converter	121	92
G.P. Zemtsov: Nonlinear Distortions in Synchronizing a Generator of FM Oscillations	122	94
L.B. Silkin: The Method of Paired-Sequential Averaging Summation for Describing Random Pulse Sequences	124	95
Ye.S. Barbanel', Yu.B. Okunev and V.K. Reshemkin: Condition for the Applicability of Second-Order Differential-Phase Modulation in Channels with Rapidly Varying Signal Frequency	126	98
L.L. Klyuyev and N.I. Silkov: Periodic Sequences Synthesized from Barker Sequences	128	100

THE PROPAGATION OF ELECTROMAGNETIC WAVES

A.I. Kalinin: The Effect of Rain on the Attenuation of Radio Waves Along Earth-Satellite Paths	1	3
Yu.B. Bashkuyev and Ch.Ts. Tsydypov: The Electrical Properties of Soil at Meter Wavelengths	5	7
A.A. Shur: The Effect of Climate on the Long-Range Propagation of Ultrashort Radio Waves	8	10

TELEVISION AND RADIO BROADCASTING

K.V. Ivanov and V.G. Khodatai: Controlled Companding of Broadcast Signals	11	13
V.P. Dvorkovich and A.M. Shenderovich: The Effect of Differential Distortion on the Reception of Color Television Signals	15	18
A.G. Kondratyev, M.I. Lukin and Yu.A. Shutovich: Automated Control of the Television Signal at a Television Center	22	25

MAIN LINE AND PERIPHERAL RADIO COMMUNICATIONS

A.D. Taranenko and V.A. Galochkin: Reliability Requirements for Radio Transmitters	24	27
V.V. Ginzburg, V.S. Girshov, O.V. Kustov, S.I. Lutovinov and Yu.B. Okunev: Noise Immunity of MS-Type Modems	28	32

	Page English	Page Russian
ENGINEERING PROBLEMS OF OPERATION		
V.E. Bukhviner and S.V. Tkachev: Analysis of Communications Quality on a Duplex Radio Line	31	34
MULTI-CHANNEL COMMUNICATIONS		
N.P. Nikiforov, A.I. Milin, V.E. Chernyy, N.V. Kravchuk and Yu.K. Kolokolov: The "Radas" Equipment for Interstation PCM-Microwave Communications	34	47
A.G. Muradyan and S.A. Ginzburg: Parameters of High-Speed Systems for Transmission over Optical Cables	41	56
A.V. Belous: Calculation of Maximum Threshold Improvement in Tracking FM Receivers	45	60
PART 2 RADIO ENGINEERING Volume 31		
L.A. Zhivotovskiy: Dependence of the Power Flux Density of Echo Signals on Radar Signal Polarization	49	3
S.B. Makarov and I.A. Tsikin: Noise Immunity of an Algorithm for Element-by-Element Reception with Decision Feedback in the Presence of Intersymbol Interference	53	8
G.I. Kravchenko, V.F. Markov and L.P. Mochalina: Investigation of a Superregenerative Signal Detector	57	14
Yu.K. Filipskiy: The Problem of the Dynamic Transfer Factor	61	18
E.V. Zelyakh: Extension of the Substitution (Compensation) Theorem	64	23
M.G. Vitkov: Band-Pass Delay Lines Having Least Time-Delay Dispersion Over the Spectrum	69	30
O.P. Frolov: Directional Properties of Reflector Antennas	73	34
V.P. Meshchanov and V.I. Tishchenko: Optimum Frequency Characteristics of Waveguide Directional Couplers	78	40
Stanislaw Rosloniec: External Synchronization Characteristics of an Avalanche Transit Diode	80	43
B.A. Goncharov, V.A. Polezhayev and V.M. Tuzov: Amplitude Characteristics of an RF Pulse Regenerator Based on a Hard Oscillator	83	47
S.E. London and S.V. Tomashevich: Wideband Power Adders Based on Transformers	87	52
I.V. Gryaznykh: Dynamic Properties of Digital AGC Systems	93	60
N.S. Davydova and Yu.Z. Danyushevskiy: Design of the Electromagnetic System of a Multidiode Microwave Amplifier	96	65
E.M. Manukyan: The Equations of an Integrated Transistor	103	75
G.D. Bakhtiarov, V.M. Mamro, V.A. Vavilov and G.I. Ventsel': A Fast-Response Dual Controlled Comparator Employing Hybrid-Thin-Film Construction	107	80
V.I. Sementsov: Calculation of the Inductances of Flat Conductors in Layered Media	110	85
BRIEF COMMUNICATIONS		
P.V. Belov, N.E. Kirillov and V.P. Sheklein: Efficient of Two-Dimensional Space-Time Signal-Processing Systems in Short-Wave Communications Channels	115	90
N.A. Bey, N.M. Yakusheva and L.S. Orbachevskiy: Wave Phase Velocity in a Three-Dimensional Infinite Array of Dipoles	118	94
L.E. Varakin and V.V. Zhitkov: Variance of a Complete Code from an Alphabet of Arbitrary Size	120	97
Yu.G. Baykov and V.I. Fedotov: Investigation of Broad-Band Transistor-Amplifier Matching for Weak and Strong Signals	121	99
V.P. Krivozubov, V.P. Kubanov and G.V. Gabuyev: RF-Pulse Distortion in Rain	123	102
